Competitive Advantage:

Soak Tank Degreasers-Best Soak Tank Degreasers

Save Soak Tank System helps catering / hospitality related businesses cut costs and increase efficiency

The system is the most efficient and cost effective method of removing Carbon and FOG (Fats, Oils & Grease).

Restaurants, Hotels, Bakeries, Supermarkets and other Commercial kitchens depend on this state of the art technology for the ultimate cleaning power, for reducing utility bills, lowering kitchen overhead, increasing productivity and providing a meaningful Return on Investment.

Heated Soak Tank used in Commercial Kitchens and Bakeries to clean Carbon Build up and F.O.G. (Fats, Oils & Grease) from equipment including aluminum baking pans, hood filters, baking racks, floor mats and more

How to use ?

Fill the tank with clean hot water to the maxim - Line

Plug into the electrical outlet and switch on

Set the temperature;

Add the carbon/ oil remove powder and stir the solution

Load the equipment such as pots, pans, hood filters and more. Use the lifting basket to lower the items into the appliance.

Remove the items and rinse off any carbon residue. Heavily carbonized equipment may need an additional soak.

Tank :1.These are all double walled and insulated. The tank material : sus 304

Lid: 2.will have a lockable lid when open or shut similar to the photos.

Basket:3.Basket can be able to remove from the tank and have a number of lift points in the inside of the tank, as it can get heavy with kitchen equipment;

Wheel:4.For wheels we will design to provide heavy duty lockable castor wheels ,so hold the caster wheel from moving and ease moving during cleaning time
