Our Services

Customize a suitable machine for yourself

We have many customers with their different need of the machine, so customize the functions are very important.

The functions we provide normally.

1. Filter System: The most popular function for the heavy oil cleaning, like the engine/ carburetor/ heating exchanger.

With a smaller filter tank and filter bag to keep the water or detergent in ultrasonic tank clean.

2. Bubbling System: Usually use with the filter, some heavy sediment like scrap iron, bits of woods can not flow into the filter tank, so we need blow them onto the top of water and filtrate them.
