## Product Description

### 80 Liter Ultrasonic Bath for Spinneret in Textile Industry with 3000 Watt Heating Power

In the production and processing of non-woven fabrics, the cleaning of the spinneret is undoubtedly an important work flow. The cleanliness of the spinneret has played a certain role in the quality of the produced non-woven fabrics. Do everything possible to clean the spinneret.

The structure of the spinneret of the non-woven fabric determines its cleaning difficulty. The small or blocked the very difficult to clean. In the past, many non-woven fabric processing plants used ultrasonic cleaning machines to clean the spinneret with high pressure water guns. It is troublesome to clean and easy to damage the spinneret. The latest cleaning method is the ultrasonic cleaning machine to clean the non-woven spinneret. It not only has fast cleaning efficiency, but also has less damage to the spinneret.
