Product Description

Scrap Iron Ultrasonic Cleaning Machine 77 Liter Capacity 1200W Ultrasonic Power

Laboratory medical ultrasonic cleaning machine. The typical characteristics of this ultrasonic cleaning machine are silent design, almost no noise, and the noise can be controlled at about 60 decibels. And the LCD display has sweep frequency and degassing function, uniform and no dead angle cleaning, which can effectively clean the blind holes in the slit. With its excited circuit board, the ultrasonic conversion rate is higher, and it is equipped with a heat sink, so the body is not easy to generate heat. Very suitable for laboratories, hospitals and other places.

How does Ultrasonic Cleaner work?

DIRT ELIMINATION PROCESS THROUGH ULTRASONIC TECHNOLOGY

- Cleaning effect will be much better if using the machine together with proper solvent.

As ultrasonic wave through the solution in the tank, cause alternating high and low pressures in the solution.

During the low pressure stage, millions of microscopic bubbles form and grow. This process is called "CAVITATION".

During the high pressure stage, the bubbles implode releasing enormous amounts of energy. They work in all directions, attacking surface and invading all recesses and openings.
