

Spinneret Plate Ultrasonic Cleaning Machine 77L 5*45*35cm With Heating Function

Our Product Introduction

for more products please visit us on skymenultrasonic.com

Basic Information

- Place of Origin: China
- Brand Name: SKYMEN
- Certification: CE, RoHS, FCC, REACH
- Model Number: JP-240ST
- Minimum Order Quantity: 1
- Price: Negotiation
- Packaging Details: Wooden case
- Delivery Time: In Stock
- Payment Terms: T/T

Product Specification

- Model: JP-240ST
- Internal Tank Size: 800*300*400mm
- Frequency: 28 / 40KHz
- Transducer: 24pcs
- Ultrasonic Power: 1200W
- Heating Power: 3000W
- Capacity: 77L
- Application: Spray Flannel Mold Cleaning
- Function: Removing Dirt, Rust, Oil, Grease
- Filter: 1 Set
- Highlight: Spinneret Plate Ultrasonic Cleaning Machine, 77L Heating Ultrasonic Cleaning Machine, 1200W Automotive Ultrasonic Cleaner

Product Description

Nozzle Ultrasonic Cleaning Machine 55*45*35cm with heating Function

Main performance characteristics

The washing machine is operated by single chip software.

The cleaning machine's sound reduction cover and cleaning tank are made of high quality stainless steel.

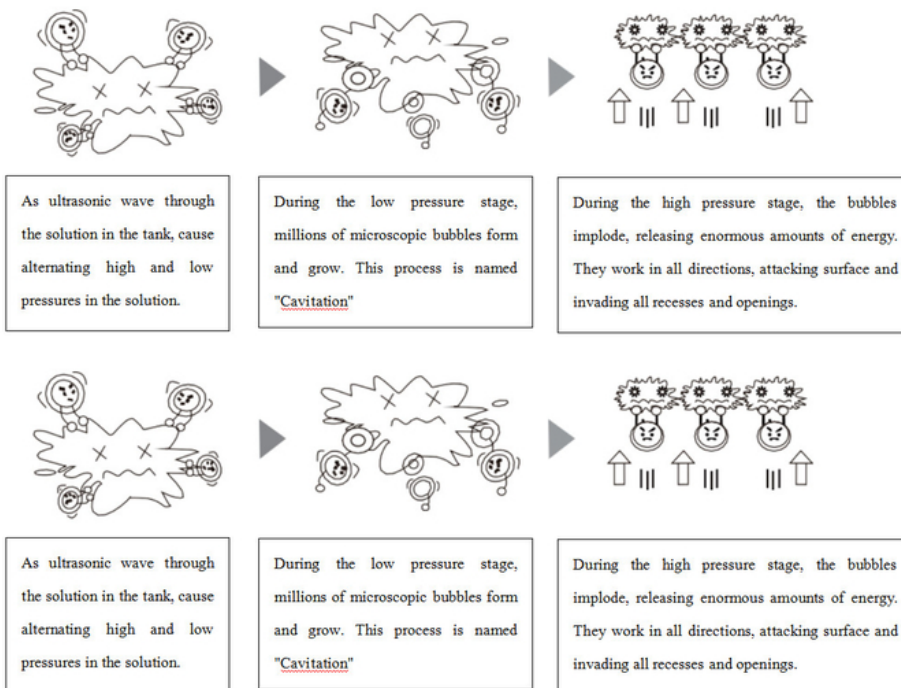

The washing machine has good sealing performance and has sound insulation and heat insulation effect.

Digital display over temperature, over voltage, over current, low water level, no solution protection indication.

Digital memory, setting display ultrasonic working time, ultrasonic power, liquid level (and actual liquid level), heating temperature (and actual temperature).

The cleaning machine circuit has an automatic frequency sweep function, which can generate a continuous pulse jet, which makes the cleaning effect more obvious and the work is more stable.

The cleaning circuit and device are upgraded and matched, and the power conversion rate is high and the reactive power loss is low.

Manual cleaning & Ultrasonic cleaning

Usually we use a water gun to flush the engine manually. It seems easy operation and convenient, but many of dead angles are easily to missed, and it's also waste the time and manpower.

Ultrasonic cleaning is a convenient and fast way to save manpower and time, it can Perfect for cleaning the longhole, finedraw and shelter of piece part or workpiece, no need to touch cleaning fluid by your hands.

You just need to put the engine cylinder head into the liquid of machine, and turn on the power.

The machine will generate sound waves, when the sound waves travel through the liquid, millions of tiny bubbles form and burst continuously, the formation and implosion of these bubbles occurs at rates of thousand of time per second, the bursting bubbles scrub everywhere the liquid can penetrate. Intricate surfaces and difficult access areas people can not reach manually.

Specifications:

Model name	JP-240ST
Internal tank size	55*40*35mm
Application	Clean nozzle, spinneret plate
Function	Removing dirt, oil, rust, grease
Feature	No damage to precision mold
Tank capacity	77L
Transducer	24pcs
Ultrasonic power	1200W
Heating power	3000W
Time control	0~99 minutes
Temperature control	20~95°C
Water inlet / outlet	Yes
Voltage	220V / 110V
Filter	1 set
