Product Description

Ultrasonic Cleaner for Watchmaker's Shop Clean Watch Parts Ultrasonic Bath

Professionals ultrasonically clean the coins long enough only to remove heavy dirt from the hard-to-get places like around small inscriptions and fine details, then finish the cleaning process with a lighter technique such as brushing. This saves a lot of time in scrubbing and picking. It is always better to underclean a coin than overclean it. And the ultrasonic cleaners CAN overclean! This is why while cleaning copper, bronze and brass coins by ultrasonics, you have to watch out and stop the process as soon as you observe satisfactory results
