Product Description

Ultrasonic Cleaner for Stones Jewelry with Heating 1 Liter Ultrasonic Bath

General Jewelry Care

Keep your fine jewelry items from contact with one another to avoid abrasion.

Keep your jewelry looking new by cleaning it regularly. Soap and oils from fingerprints can significantly detract from the beauty of your diamonds and fine jewelry.

Apply makeup and cosmetics prior to putting on your jewelry. Chemicals in these substances can often harm the look of your gold and damage pearls.

Avoid wearing jewelry in swimming pools. Chlorine can react with metals causing color and structural damage.

Fine jewelry items should not be worn while engaged in activities where they would be subject to any form of brushing or hard contact. A strong blow from the side could dislodge a gemstone from its mounting. If you decide to wear your jewelry while gardening, please exercise caution.

Cultured pearl necklaces should be strung with knots between each bead. Please keep all pearls away from hair spray, perfume, and cosmetics.

It is recommended that all jewelry be inspected semi-annually or after any sharp blow to stones or mounting.
