## Product Description

### Ultrasonic Cleaner for Diamond/Ruby with Heating Ultrasonic Bath

#### Ultrasonic Cleaning

Diamond, Ruby, Sapphire, Amethyst, Citrine, and Created Gemstones – Ultrasonic cleaning machines are perfect for these gemstones. Please be sure to keep items from touching one another while cleaning. Check all stones after cleaning for a tight fit in the mounting. If you do not have a cleaning machine, commercial jewelry cleaner solution or water mixed with a small amount of dish washing soap works fine with a soft cloth or brush to remove any fingerprints. Gemstones that are not translucent, such as pearls, opals or onyx, should, as a general rule, not be cleaned in an ultrasonic cleaner or cleaned with an abrasive or ammonia based cleaner.
