SUS304 Heavy Duty Ultrasonic Cleaner 360L With 9000W Heating Power - JP-720G

Basic Information

Product Specification

• Tank Size: 1000*600*600mm

• Ultrasonic Power: 3600W • Capacity: 360L 9000W • Heating Power: 28/40KHz • Frequency: SUS304 • Material: Model: JP-720G 1-99hours • Timer:

• Highlight: SUS304 Heavy Duty Ultrasonic Cleaner,

> Heavy duty Ultrasonic cleaner 360L, **Heavy Duty Industrial Ultrasonic Washing**

Machine

Product Description:

The JP-720G Industrial Ultrasonic Cleaner provides an extremely effective, automated cleaning solution for industrial and automotive applications. With a capacity of 360L, this industrial cleaning machine utilizes ultrasonic frequency of 28/40KHz and features a large tank size of 1000*600*600mm, constructed of SUS304 material for superior durability and corrosion resistance. The JP-720G Industrial Ultrasonic Cleaner is ideal for industrial and automotive applications, offering outstanding performance and superior cleaning power in a single, compact machine. This reliable, automated cleaning machine is designed for maximum efficiency with minimal maintenance requirements, making it an ideal choice for industrial and automotive cleaning applications.

Features:

Ultrasonic cleaner: Ultrasonic Cleaning Machine

Frequency: 28/40KHz Tank Size: 1000*600*600mm

Material: SUS304 Capacity: 360L Model: JP-720G

Industrial Ultrasonic Cleaning Machine: Ultrasonic Cleaning Machine

Dry Cleaning Machine: Ultrasonic Cleaning Machine

Technical Parameters:

Parameter	Value
Industrial Ultrasonic Cleaner	JP-720G
Heating Power	9000W
Timer	1-99hours
Material	SUS304
Tank Size	1000*600*600mm
Capacity	360L
Frequency	28/40KHz
Ultrasonic Power	3600W

Applications:

The JP-720G Ultrasonic Cleaning Machine is a powerful and efficient auto parts dry cleaning machine, which is perfect for any industrial cleaning. This model has a capacity of 360L and a frequency of 28/40KHz, as well as an ultrasonic power of 3600W and a timer of 1-99hours. With this machine, you can quickly and effectively clean delicate auto parts, such as engine parts, aluminum parts, and other small objects. This amazing machine is perfect for use in workshops, factories, and other industrial settings, as it has the capability to effectively and efficiently clean a variety of items.

The JP-720G Ultrasonic Cleaning Machine is a perfect solution for any business that needs to quickly and effectively clean delicate auto parts. With its powerful 3600W ultrasonic power and a capacity of 360L, this machine can easily and effectively clean a variety of items, including engine parts, aluminum parts, and other small objects. This machine also features a timer of 1-99hours, allowing you to easily set the cleaning time for any item.

Whether you are looking for an efficient and reliable auto parts ultrasonic cleaner or a powerful dry cleaning machine, the JP-720G Ultrasonic Cleaning Machine is the perfect solution. With its high-powered ultrasonic power and large capacity, this machine is perfect for any industrial setting, allowing you to quickly and effectively clean delicate auto parts. This machine is also perfect for use in workshops, factories, and other industrial settings, as it has the capability to effectively and efficiently clean a variety of items.

Packing and Shipping:

Packaging and Shipping for Ultrasonic Cleaning Machine:

The Ultrasonic Cleaning Machine should be securely packaged in appropriate transport packaging to minimize the risk of damage during transport. The packaging should be strong enough to protect the Ultrasonic Cleaning Machine from shocks, vibration, compression, and other environmental conditions that could affect its performance. The packaging should be clearly labeled with the product name, serial number, weight, and dimensions.

The Ultrasonic Cleaning Machine should be shipped with a reliable shipping company and should be insured for the full value of the product. The tracking information should be provided to the customer upon shipment.

- Q: What is the ultrasonic cleaning machine used for?
- A: The ultrasonic cleaning machine is used to generate high frequency sound waves to remove dirt, oil and other contaminants from a variety of objects.
- **Q**: What materials can the ultrasonic cleaning machine clean?
- A: The ultrasonic cleaning machine can clean delicate items such as jewelry, watches, and eyeglasses, as well as hard items such as tools, medical instruments, and circuit boards.
- $\mathbf{Q}\!:$ How long does it take to clean items using an ultrasonic cleaning machine?
- A: The cleaning time depends on the size, shape, and material of the item being cleaned. Generally, it takes 1-5 minutes.
- Q: Is the ultrasonic cleaning machine safe?
- A: Yes, the ultrasonic cleaning machine is safe. It uses a water-based cleaning solution and does not emit any harmful chemicals.
- Q: Does the ultrasonic cleaning machine require any special maintenance?
- A: Yes. The cleaning solution should be changed regularly and the machine should be inspected for any damage or wear and tear.
