

## 3600W Power Ultrasonic Cleaning Machine 360L Large Industrial Ultrasonic Cleaner

Our Product Introduction

for more products please visit us on [skymenultrasonic.com](http://skymenultrasonic.com)

### Basic Information

### Product Specification

- Heating Power: 9000W
- Tank Size: 1000\*600\*600mm
- Material: SUS304
- Capacity: 360L
- Timer: 1-99hours
- Frequency: 28/40KHz
- Model: JP-720G
- Ultrasonic Power: 3600W
- Highlight: 3600W Ultrasonic Cleaning Machine,  
Auto Parts Ultrasonic Cleaning Machine,  
360L Large Industrial Ultrasonic Cleaner

## Product Description

### Product Description:

Our Ultrasonic Cleaning Machine is the perfect solution for cleaning automotive parts and components. It features a powerful 9000W heating power and 3600W ultrasonic power, making it one of the most efficient ultrasonic cleaners on the market. The machine is constructed from high-grade SUS304 material, which is durable and able to withstand high temperatures. It comes with a timer that can be set anywhere from 1 to 99 hours, and can be adjusted to two frequencies - 28KHz and 40KHz. Our Ultrasonic Cleaning Machine is ideal for cleaning automotive parts and components quickly and efficiently, without the use of harsh chemicals or abrasive materials.

### Features:

Product Name: Industrial Ultrasonic Cleaning Machine

Frequency: 28/40KHz

Capacity: 360L

Timer: 1-99hours

Ultrasonic Power: 3600W

Tank Size: 1000\*600\*600mm

### Technical Parameters:

Technical Parameter	Value
Dental Ultrasonic Cleaner	JP-720G
Frequency	28/40KHz
Tank Size	1000*600*600mm
Capacity	360L
Heated Ultrasonic Cleaner	9000W
Material	SUS304
Ultrasonic Power	3600W
Timer	1-99hours

### Applications:

**Industrial Ultrasonic Cleaning Machine:** The ultrasonic cleaning machine is an essential piece of equipment for any industrial or automotive production line. The machine is equipped with a frequency of 28/40KHz, a heating power of 9000W, an ultrasonic power of 3600W, a tank size of 1000\*600\*600mm, and a capacity of 360L. It is perfect for cleaning and degreasing auto parts, such as engines, transmissions, and brake components. This efficient and reliable machine is ideal for any industrial or automotive production environment.

**Auto Parts Ultrasonic Cleaner:** This ultrasonic cleaning machine is the perfect tool for any auto parts production line. With its advanced frequency of 28/40KHz, a heating power of 9000W, an ultrasonic power of 3600W, a tank size of 1000\*600\*600mm, and a capacity of 360L, this machine is capable of quickly and thoroughly cleaning and degreasing parts and components. It is an ideal tool for any auto parts production environment.

**Ultrasonic cleaning machine:** This ultrasonic cleaning machine is the perfect tool for any degreasing and cleaning needs. With its frequency of 28/40KHz, a heating power of 9000W, an ultrasonic power of 3600W, a tank size of 1000\*600\*600mm, and a capacity of 360L, it can quickly and effectively clean and degrease parts and components in any production line. It is an ideal tool for any industrial or automotive production environment.

### Packing and Shipping:

Packaging and Shipping for Ultrasonic Cleaning Machine:

The product will be securely packaged in a cardboard box with bubble wrap and Styrofoam for extra protection.

We will ship the product via a reliable international carrier such as DHL, UPS, FedEx or TNT.

We will provide tracking information once the product has been shipped.

We offer free shipping for orders over a certain amount.

### FAQ:

Q: What is the capacity of the Ultrasonic Cleaning Machine?

A: The capacity of the Ultrasonic Cleaning Machine is 5L.

Q: What type of materials can be cleaned with Ultrasonic Cleaning Machine?

A: The Ultrasonic Cleaning Machine can clean materials such as metals, plastics, and glass.

Q: What is the frequency of the Ultrasonic Cleaning Machine?

A: The frequency of the Ultrasonic Cleaning Machine is 40kHz.

Q: What is the power consumption of the Ultrasonic Cleaning Machine?

A: The power consumption of the Ultrasonic Cleaning Machine is 200W.

Q: What is the operating temperature range of the Ultrasonic Cleaning Machine?

A: The operating temperature range of the Ultrasonic Cleaning Machine is between 5°C and 60°C.
