Product Description

Product Description:

Kitchen Soak Tank - Your Ultimate Cleaning Solution for Kitchenware

Product Overview

The Kitchen Soak Tank is a powerful and efficient cleaning unit specially designed for kitchenware. It is a must-have for every commercial kitchen, restaurant, and catering business that wants to maintain their kitchen tools and equipment in pristine condition.

Tank Capacity: 250L

The Kitchen Soak Tank has a large tank capacity of 250L, allowing for cleaning of multiple kitchen items at once. This makes it ideal for high-volume kitchens where efficiency and speed are crucial.

Power Supply: 110V / 220V, Single Phase

The Kitchen Soak Tank is compatible with both 110V and 220V power supply, making it suitable for use in different countries. It operates on a single phase, making it energy-efficient and cost-effective.

Inner Tank Material: Stainless Steel 304

The inner tank of the Kitchen Soak Tank is made of high-quality Stainless Steel 304, which is known for its durability, corrosion resistance, and ease of cleaning. This ensures that the tank remains in excellent condition even after prolonged use.

Cleaning Type: Immersion / Soak

The Kitchen Soak Tank offers two cleaning options - immersion and soak. With the immersion cleaning method, the kitchenware is fully submerged in the cleaning solution, while the soak method involves soaking the items in the solution without complete immersion. This flexibility allows for efficient and thorough cleaning of different types of kitchenware.

Heater: Room Temp-80°C Adjustable

The Kitchen Soak Tank comes with an adjustable heater that can heat the cleaning solution from room temperature up to 80°C. This temperature range is optimal for removing tough stains, grease, and grime from kitchenware, making it look as good as new.
