Basic Information

- Place of Origin: China
- Brand Name: Skymen / Delis
- Certification: CE, RoHS
- Model Number: JP-520
- Minimum Order Quantity: 120pcs
- Price: Negotiation
- Packaging Details: 1pcs / color box
- Delivery Time: In Stock
- Payment Terms: Western Union, MoneyGram, T/T, Paypal
- Supply Ability: 2000pcs/ Day

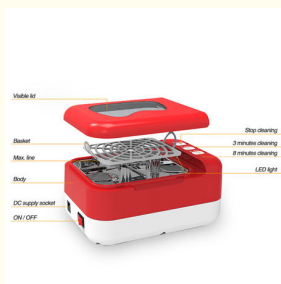

Product Specification

- Tank Size: 90x72x31.5mm
- Unit Size: 141x95x68mm
- Frequency: 58KHz
- Ultrasonic Power: 15W
- Timer: 3min / 8min
- Battery Capacity: 12.6V - 2200MAH
- Application: Denture Ultrasonic Cleaner
- N.W. / G.W.: 391g / 668g
- Highlight: **small ultrasonic cleaner, ultrasonic vegetable cleaner**

01 Fashion, Portable Design

*Fashion look ,
200ml volume is about the size of 5.5
inches phone ,
portable carry everywhere*

02 Built-in rechargeable battery

seven-hour battery life

03 Bactericidal Effect

Institute to test show that:
Klebsiella Pneumoniae Bactericide
Rate Of 96.2069%

04

Long working life

Colorful plastic housing, sus 304 tank inner

1. Why is Ultrasonic Cleaning so Efficient and Effect?

When cavitation happens near a dirty object, the vacuum action produced by those million of bubbles constantly imploding creates a tiny pressure wave that reaches deep into every nook and cranny of even the most delicate items. This tiny pressure wave dislodges and breaks up the dirt and other contaminants and gently lifts it away. The result is *very fast and effective* cleaning.

2. Advantages for Skymen Ultrasonic Parts Cleaning?

There are many advantages to cleaning parts with Skymen Ultrasonic Cleaning Systems, not the least of which are our machine's incredible versatility. In fact, our 'unofficial' motto is; *If it can fit into water, you can clean it.*

While the versatility is one major advantage allowing you to clean almost anything, there are several other advantages that will dramatically benefit both you and your clients/customers. These include:

Clean Intricate Items with Ease: Ultrasonics easily reaches deep into even the most finely detailed surfaces.

Cleans Fast: Many items can be cleaned in less than two minutes allowing you to quickly return them to your clients.

Reduces Labor Costs: Fast cleaning means jobs can be completed in fewer hours.

No Harsh/Dangerous Chemicals: Most items can be cleaned in just water with just a few ounces of our environmentally friendly cleaning solutions.

3. How to choose a suitable ultrasonic cleaner?

When you contact us regarding a suitable cleaner, please provide the following information:

What type of object do you want to clean (metal, plastic, machine part, etc.)?

What type of contaminants do you want to remove from the object?

How large is the object and how many do you need to clean?

4. What ultrasonic cleaning can offer?

Non-directional cleaning - clean where the sound and solution go

Reduced or eliminated need for disassembly

Consistent results - non-operator dependent

Non-contact cleaning - only the soil is removed, not the substrate

High efficiency - cleaning multiple parts at one time
